# What is March Mingle?

**March Mingle creates a welcoming and celebratory atmosphere to form connections between tech folk of all disciplines, invigorate the tech startup scene and boost local tech innovation.**

Since the first event in 2004, March Mingle attendance has steadily grown to more than 600 designers, developers and engineers from more than 150 San Diego based tech-focused meetup groups.

These user group meetings appear on the [SDTechScene.org](http://SDTechScene.org) events calendar, maintaining our connections to the groups and enabling us to work with group leads to invite members to March Mingles. This makes March Mingle unique, bringing technologists together from a variety of technical backgrounds to cross pollinate and strengthen San Diego's tech industry as a whole.

# Why March Mingle is Important

- A committed community of top technical people, a majority of whom come back year after year
- A space that is comfortable for all who attend, with geeky activities and icebreaker tags
- San Diego's tech scene deserves an annual celebration!
